

Avoided Cost Rate by Electric Utility
2024 Avoided cost rates

Pursuant to the Commission’s General Order dated September 19, 2019 (“Distributed Generation Rules”), customers who submit an interconnection request and/or install a distributed generation facility *after* December 31, 2019 shall pay the full retail rate for all energy purchased from the utility, shall pay a zero rate for all energy self-generated and consumed, and shall be credited at Avoided Cost for the energy sold back to the utility.

Avoided Cost shall be calculated as the 12-month average Locational Marginal Price for each jurisdictional electric utility. The Avoided Cost Rate will be updated annually by each electric utility in their annual filing pursuant to the Distributed Generation Rules, and the calculation of Avoided Cost will be the 12-month average for the prior calendar year of the Locational Marginal Price associated with the electric utility’s load zone in the applicable Regional Transmission Organization market (Midcontinent Independent System Operator or the Southwest Power Pool). The Avoided Cost Rate by each jurisdictional electric utility is:
